The screenshot displays the Microsoft SQL Server Enterprise Manager interface. The 'Object Explorer' on the left shows the 'GARRETTSURFACE' database structure, including databases, system databases, database snapshots, promo universe, report server, report server tempdb, URSocial, database diagrams, tables, system tables, file tables, locations, loc categories, schools, students, views, synonyms, programmability, service broker, storage, security, server objects, replication, always on high availability, and management. The 'dbo.Students' table is selected, and its data is displayed in the main pane. The table has 8 columns: userID, firstname, lastname, email, age, schoolID, locationID, and category. The data is as follows:
